PROFESSIONAL SUMMARY

Full-Stack Developer with real-world experience designing and delivering scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), Vue.js, and TypeScript. Experienced in building end-to-end solutions from responsive, accessible frontends to robust REST APIs and NoSQL database architecture in production environments. Proficient with Git and GitHub for version control and collaborative development.

EXPERIENCE

Front End Web Developer Intern

DepEd Calabarzon | January 2026 – April 2026

- Built a multi-channel feedback system serving thousands of users via online forms, email, and QR-based submissions.
- Deployed accessibility-first tablet stations across departments, enabling seamless public data input.
- Developed analytics dashboards with real-time data visualization and Excel export for office and service tracking.
- Streamlined reporting workflows, improving transparency and accountability across DepEd Calabarzon offices.

SKILLS

Languages	JavaScript, TypeScript, C++
Frontend	React.js, Vue.js, HTML, CSS, Tailwind CSS
Backend	Node.js, Express.js, REST APIs
Database	MongoDB
Tools	Git, GitHub, GetStream, Stripe API, IoT/ESP Integration, Render, Vercel, Netlify
Soft Skills	Problem-Solving, Teamwork, Communication, Time Management

EDUCATION

2022 – 2026 **University of Rizal System — Cainta, Rizal**
Bachelor of Science in Information Technology

PROJECTS

Logs & Feedback System — DepEd Calabarzon

Vue.js | TypeScript | Laravel

Multi-channel submission system (online, email, QR code) serving thousands of users across departments.

- Real-time analytics dashboard with Excel export and most-visited office/service tracking.
- Role-based access control with dedicated tablet stations for department-level accessibility.

AI-Powered Chat Application

React.js | Node.js | Express.js | MongoDB | GetStream | Gemini AI

- Real-time messaging with AI-powered conversations via Google Gemini integration.
- One-on-one and group chat with video and voice calling via GetStream.
- Friend system, group management, and multi-participant group call support.

Smart Room Scheduling System with IoT Door Lock

React.js | MUI | Laravel | ESP Microcontrollers

- Scheduling platform with room and course management and a responsive Material UI interface.
- Integrated ESP microcontrollers to fetch one-time access codes from the system and automatically unlock doors upon schedule.
- Automated physical room access tied directly to schedule data, eliminating manual key management.
